

Giuseppe Saluto

Backend Developer | Python · Rust · Docker · MongoDB

g.saluto15@gmail.com | linkedin.com/in/giuseppe-saluto | github.com/GiuseppeSaluto | Modena, Italy

PROFESSIONAL SUMMARY

Backend Developer with 3 years of experience building REST APIs and B2B platforms in Python. I build backends that turn real-world data into something people can use: in my own projects I take a real data source and build the whole pipeline around it, from ingestion to storage to dashboards, with Docker, tests and CI. Python is my main language; Rust is what I use when a service has to be small and fast.

TECHNICAL SKILLS

Languages & Frameworks: Python (Flask, REST APIs), Rust, Dart (Flutter), HTML, CSS, JavaScript

Databases: MySQL, MongoDB, Redis / Valkey

DevOps & Tools: Docker, Git, CI/CD Pipelines, Linux, Figma, Shopify, MongoDB Compass, DBeaver

Methodologies: Agile, Scrum, Mobile Development, B2B Software, E-commerce

Languages: Italian (Native), English (B1-B2)

PROFESSIONAL EXPERIENCE

Software Developer | OT Consulting (via Credem Banca), Reggio Emilia, Italy Mar 2026 – May 2026

- Developed and maintained a proprietary mobile application for Credem Banca as part of a consultancy engagement
- Collaborated in multilingual and multidisciplinary Agile/Scrum teams, contributing to sprint planning and daily standups
- Applied mobile development best practices and contributed to CI/CD pipeline maintenance

Full Stack Developer | Asc27 Srl, Bologna, Italy Mar 2024 – Dec 2025

- Developed cross-platform mobile applications using Flutter (Dart) for B2B clients in the AI-driven software sector
- Built and maintained Python (Flask) back-end services to power scalable and secure REST APIs
- Contributed to the design and implementation of AI-based custom software solutions
- Worked within Agile teams, delivering production-ready features on schedule

Junior Full Stack Developer | Made in Evolve Srl, Modena, Italy Sep 2023 – Mar 2024

- Automated internal business workflows using Python scripting, reducing manual processing time
- Managed and optimized a B2C e-commerce platform on Shopify, improving product listings and UX flows
- Maintained backend modules with PHP (Laravel) for a proprietary management system; primary work focused on Python automation and app development
- Developed internal tooling and proprietary applications to support operations

Warehouse Operator (Part-time) | Conad, Rimini, Italy Sep 2021 – Jan 2023

- Handled internal warehouse logistics operations and stock movements
- Organized and replenished goods on shelves and in store aisles
- Monitored and updated electronic shelf labels (ESL) using a PDA device

Editor & Content Creator | IGN.it / VGN.it, Remote Jan 2018 – Dec 2019

- Authored game reviews and tech articles for Italy's leading video game media agency
- Produced and streamed live content on the official IGN Twitch channel

EDUCATION

Industrial Robotics Maintenance 4.0 | Manpower Academy, Reggio Emilia, Italy Sep 2026 – Oct 2026

- Skills covered: PLC programming, fieldbus, industrial robots, predictive/mechanical/electrical maintenance, Python

Software Developer Course (240h) | CIS Reggio Emilia / FormaTemp, Reggio Emilia, Italy Jun – Jul 2023

- Modules: Business Organization (32h), Health & Safety (4h), Rights & Duties (4h); Development (200h): Relational Databases, Python, Web Technologies (HTML/CSS/JS), Web Application Stack

Full Stack Developer Bootcamp (400h) | Aulab Srl, Italy Feb 2023 – May 2023

- Skills covered: HTML, CSS, JavaScript, PHP, Laravel framework, Agile methodologies

Diploma – Liceo Scientifico | Liceo Michelangelo Buonarroti, Italy
